

Development guide - Uploads Invoice from Serini- cloud to Amazon

This document explains how to submit an invoice using our system serini-cloud.

Step 1: Registration to serini-cloud.com

Step 2. Log in to serini-cloud, go to Settings-> sales channels-> Amazon and we authenticate and connect the Amazon account with the system.

A screenshot of the SeriniCloud web interface. The top navigation bar includes the SeriniCloud logo and menu items: Goods, Orders, Warehouse, Amazon, Shops, Statistics, and Settings. The main content area is titled "Add an Amazon account" and includes a "Back to the list" button. Below the title, there is a "Configuration for Amazon:" section with four input fields: "Name" (Amazon.de), "Marketplace" (Germany), "Store" (ABC TES), and "Warehouse" (ABC TES). Below these fields are four checked options: "Download AFN orders (FBA)", "Send invoices for AFN (FBA) orders to Amazon", "Download MFN orders", and "Sending invoices for MFN orders to Amazon". At the bottom left of the form is a "Save" button. Two red arrows point to the "Add an Amazon account" title and the "Save" button.

DONE !!!

In the event that Amazon sellers have questions regarding the configuration of the service, please contact us by phone:
