

Development guide - Uploads Invoice from Serini- cloud to Amazon (VAT Calculation Service)

This document explains how to set up the download data for VAT invoices from Amazon and how to submit invoice using our serini-cloud system.

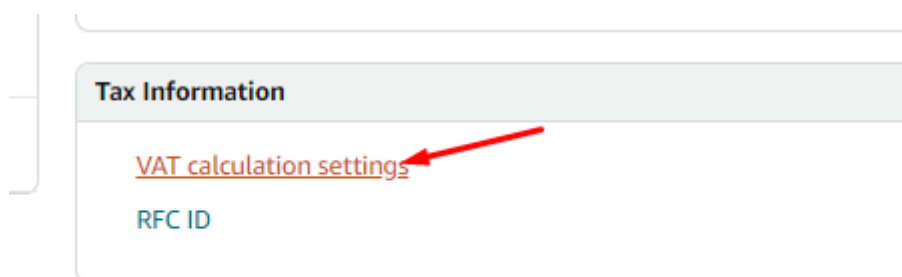

Step 1: Registration

Verify on Amazon that you're eligible for Amazon VCS and that your Amazon Merchant Center is correctly configured.

1.1

1.2

1.3

Default country for VAT exclusive price

Poland

Invoice generation

You must provide invoices to customers from the date of activation. [How to upload invoices](#)

[CHANGE](#)

[Go back to Account information](#)

1.4 We choose this option and save. Once activated, a VAT invoice can be received and sent to amazon.

Invoice Generation (i)

I want Amazon to automatically generate VAT invoices.

Recommended

It is that easy. Invoices generated by Amazon will be available to your customers immediately after shipment. You will also be able to download these invoices for your records.

I will upload my own VAT invoices.

It is your responsibility to upload VAT invoices within one business day after shipment. If you do not upload VAT invoices within one business day after shipment, Amazon may remove you from VAT calculation service.

[How to upload invoices](#)

(i) Your VAT calculation settings were activated on **October 31, 2019**
The VAT calculation service can be stopped from the Summary page

Save

Cancel

Step 2. We log into the serini-cloud and perform authentication and connection of the amazon account to the system.
